

TORQUE TESTER FSA

- torque measurement in both directions
- high speed of measurement - up to 1000 samples per second
- peak mode
- storing measurement results into memory
- USB and RS232C serial interface
- statistics, graphs, comparing to thresholds function

Cap torque testers FSA series are designed for measuring torque during opening jar, bottles etc. Measurement processor enables to register maximal force torque needed for example to open a jar. Tester is equipped with a wide range clamp to measure variety of objects.
