Marsden M-530:

An extra wide, high capacity floor scale suitable for almost any patient

The Marsden M-530 is a high capacity, high accuracy floor scale, with a low profile base and separate indicator for discreet weighing.

High capacity, high accuracy

The Marsden M-530 has an extra high capacity – it has been purpose built for larger patients. Choose from either a 300kg or 500kg capacity.

The accuracy of the M-530 is impressive, too. This medically approved scale weighs in increments as precise as 50g on the 300kg version, and 100g when you choose the 500g version.

Bluetooth connectivity is also available on this scale for connectivity to databases, spreadsheets, smartphones, tablets and PCs for easy data transfer. See the M-530's specifications on the next page for more information.

Available with Bluetooth connectivity

Remote display for weight sensitive areas

Easier for the patients, easier for you

With a rechargeable battery, the M-530 can be used absolutely anywhere regardless of where the nearest plug socket is. An AC adaptor is also provided.

Getting a weight reading with the M-530 is easy.

The indicator has two large screens which clearly display weight, and BMI can be calculated on the second screen.

The Hold function allows you to stabilise the weight reading, even after the patient has stepped off the scale.

Choose the Bluetooth option and data can be wirelessly transferred to your central database.

For patients, an extra – low profile platform means less effort stepping onto the scale.

Built to last

The M-530 is built to last. For extra protection, particularly when transporting, use the optional carry case. This scale is backed by a full two-year warranty and can be covered with a Marsden service contract.

Product Specifications

Capacity: 300kg/500kg
Graduations: 50g < 150kg > 100g (300kg)
