Marsden M-620:

A heavy-duty, Class III Approved weighing scale for wheelchairs

The Marsden M-620 is a Class III Approved wheelchair weigher which is ideal for use in care homes.

A robust, portable wheelchair weigher

The Marsden M-620 makes weighing wheelchair bound patients easy. A large handle and wheels make moving it between wards or rooms easy – and the platform can be folded away when the scale is not in use.

Because we know weighing scales can take a battering when used regularly, we've made the M-620 robust. It's built to last, and will be even more reliable if backed with a Marsden service contract.

The scale has optional Bluetooth connectivity for transferring data to a central database, smartphone, tablet or PC.

Robust, heavy duty scale

Ideal for care homes

Optional thermal printer

Easy to use

Getting a weight reading – accurate to 100g – is quick and easy with the M-620.

With a rechargeable battery fitted this scale can be used absolutely anywhere regardless of where the nearest plug socket is. An AC adaptor is also supplied.

This indicator has two displays, which show weight, height and BMI. By using the full numeric keypad, a height can be manually entered into the scale and BMI will be automatically calculated.

Tare and Pre-set Tare can be used to deduct the weight of the wheelchair.

A printer can be added to this scale for a printed record of a patient's weight, height and BMI reading along with the date and time the readings were taken.

Find out more

The M-620 is covered by a full Marsden two-year warranty. For more information about the M-620, Bluetooth connectivity or service contracts, please get in touch.

Product Specifications

Capacity: 300kg
