## Marsden M-640: For versatility in weighing bariatric and geriatric patients

Typically, the higher the capacity, the less accurate the scale. Not with the Class III Approved Marsden M-640. This is a bariatric scale that can deliver weight readings as accurate as 50g, yet it's capable of weighing some of the heaviest bariatric patients.

### Complete comfort in weighing

The M-640 provides a comfortable weighing solution, **whatever the patient's needs.**

A **sturdy handrail** provides support for patients who can stand, but are unsteady on their feet. If the patient wishes to sit down to be weighed, a **hinged seat** is available.

If the patient is in a wheelchair, the base of the scale has **ramps on each side** and plenty of room for the wheelchair.

### High capacity, superb accuracy

There are two versions of the M-640 available.

Our **300kg capacity** version is the most popular: Most patients will be under 300kg in weight - and it is this version of the scale that is **accurate to 50g** (or 100g once 150kg is reached).

Or, if the extra capacity is required, there is a **500kg** M-640. This is **accurate to 100g** (or 200g over 300kg).

Either option provides the accuracy required for **most medical requirements** - for example, 50g/100g accuracy is required in weighing for critical treatment, and 200g accuracy is suitable for measuring weight to assist in medical diagnosis.

## Easier, more accurate weighing

The M-640's indicator is mounted on the handrail, making it much easier to see the weight reading once the patient is on the scale.

For an even more accurate reading when the patient is in a wheelchair, use the **Tare and Preset Tare** functions to remove the wheelchair's weight from the display. Use the **full numeric keypad** to **calculate BMI**.

## Key features

- Class III Approved
- Rechargeable battery (adaptor provided)
- Full numeric keypad
- Three displays - weight, height, BMI
- Hold/Tare/Zero
- Handrail with hinged seat
- Large base with ramps for wheelchairs

## Send readings to a database or printer

If you have a central patient database that can accept data from medical devices via **Bluetooth or Wifi**, the M-640 is available with either. Alternatively, an **optional printer** allows you to print patient weight data.

## Specification

- Class: III
- Capacity: 300kg or 500kg
- Graduations: 50g<150kg>100g (300kg)  
100g<300kg>200g (500kg)
- Power: Mains/rechargeable battery
- Platform dimensions: 800mm x 800mm
- Weight of Scale: 46kg
