## Marsden M-800:

A high capacity, Class III Approved scale with handrails for supporting patients

The Marsden M-800 is a superbly designed handrail scale, which provides a large weighing platform and low profile access.

### Stable, confident weighing

The M-800 is designed for patients less steady on their feet.

Sturdy handrails provide stability, and no matter how much pressure is put on the handrails, they'll support the patient.

The M-800 has a capacity of 300kg weighing in 50g/100g increments. And because it's medically approved, you can count on it for accuracy and reliability.

Large platform and low profile access

Optional thermal printer

GROSS WEIGHT	97.45kg
TARE WEIGHT	0.00kg
NET WEIGHT	97.45kg
PATIENT HEIGHT	178.8cm
PATIENT B.M.I	30.4
14/08/2014	10:52

**MARSDEN**  
ACCURACY ASSURED

Print

Easy to use function keys

Curved handrails for stability

## Easy to use

Setting up the M-800 is easy. A built-in rechargeable battery means that it can be used anywhere.

The scale has two displays which show weight, height and BMI. By using the full numeric keypad height can be manually entered to calculate the BMI.

The M-800 has Tare and Pre-set Tare so that any additional weight can be deducted before weighing the patient – meaning you have an accurate weight reading.

A printer can be added for a printed record of the patient's weight, height and BMI reading along with the date and time the readings were taken.

Alternatively, the Bluetooth option allows wireless data transfer to a central database.

## Built to last

Like other scales in the Marsden range the M-800 is built to last. It comes with a two year warranty, and for extra peace of mind it can be kept accurate and reliable with a Marsden service contract.

## Product Specifications

Capacity: 300kg  
Graduations: 50g < 150kg > 100g  
Weight of scale: 33kg  
Power Supply: Mains/Rechargeable Battery  
Dimensions: 700 x 600 x 50mm

## Optional Extras:

Bluetooth Connectivity  
Thermal Printer  
Manual Height Measure

Accuracy Assured
