Wireless baby scale  
with optimized damping  
system 

**EMR-integrated**

- Wireless transmission of data for EMR connectivity or wireless reception.
- Damping system for precise weighing of restless infants within seconds.
- Auto-HOLD function for prolonged display of results.
- Ergonomically-shaped tray for safe and secure placement of the baby.
- New backlit LCD for easy reading.

## seca 757:

### Pediatric requirements carry weight.

**S**eca makes routine work easier for doctors, nurses and other caregivers. The seca 757 does just that – by giving them a highly flexible wireless user experience. Its state-of-the-art weighing technology is now more accurate than ever and features a special damping system, making weighing fast, safe and precise. You can even unplug it and use it anywhere with its rechargeable battery power supply.

#### The damping system ensures fast and precise measurements.

A baby can certainly be fidgety at times and that's allowed with the seca 757. Even if the baby does not lay peacefully and starts to wriggle around, the scale delivers precise measurements within seconds thanks to its highly sensitive weighing technology. Its optimized damping system levels any vibrations caused by these movements, enabling medical staff to concentrate completely on the weighing process.

#### Comfortable and reliable weighing process.

The large weighing tray makes the baby feel safe and secure. Its generous size even allows small children of up to 15 kilograms to be weighed easily in a seated position. Made of a special plastic material, it quickly adjusts to the body temperature, giving the baby a sense of comfort. A new backlit LCD display ensures comfortable reading of the digits, even in dimmed rooms. Reading becomes easier than ever due to the auto-HOLD function. It freezes the measurement result on the display for five minutes with battery operation and endlessly with power supply. Medical staff can then take care of the baby before reading and recording the weight.

#### Paperless and error-free wireless transmission of measurements.

With the seca 360° wireless technology, the seca 757 can transmit measurements to the optional seca 360° wireless digital printer. With the network-capable software solutions seca analytics 115 or seca emr flash 101 and wireless USB adapter seca 456, your PC can receive and analyze measurements and forward them to an Electronic Medical Record (EMR) system. The seca 757 is EMR integrated, ready to handle digital patient records and all the demands the future will bring. For more information about EMR integration, visit: [www.seca.com](http://www.seca.com).

*Thanks to the additional measuring tape, the seca 757 enables a precise measurement of the babies' length.*

*The new backlit LCD display ensures an easy reading of the digits, even in dimmed rooms.*

*Can be operated by battery or power adapter.*

### Technical Data

- Capacity: 15 kg
- Graduation: 2 g < 5 kg > 5 g
- Dimensions (WxHxD): 551 x 151 x 320 mm
- Weight: 7.1 kg
- Power supply: Power adapter / rechargeable batteries
- Functions: TARE, HOLD, auto-HOLD automatic switch-off, damping
- Approval class:
- Data transmission: wireless technology seca 360° wireless
- System compatible with: 360° wireless printer advanced seca 466, 360° wireless printer seca 465, software seca analytics 115 and seca emr flash 101, 360° wireless USB adapter seca 456
- Additional measuring tape:
  - Measuring range: 0–50 cm / 0–20"
  - Graduation: 1 mm / 1/8"
