## ODECA s.r.l.

Mod. 843 - Floor scale with wheels

Floor scale with mechanical reading dial with diameter 570 mm.

The dimensions of the loading platform are: 800x750 mm and is made up of a steel heavy duty plane with a tubular protection for the column.

The internal levers are made up of AQ42 steel with bearings and knives in Ni-Cr-Mo steel with hardness 63-65 HRC.

The oscillation of the index is adjustable through a shockabsorber with oil equipe with mechanical regulator.

The structure is oven painted with epoxidic enamel or, optionally, it is available the completelly stainless steel version or the only stainless steel loading platform.

For the handling the Mod. 843 is provided with 4 wheels and 4 adjustable feet.

## Mod. 843 Mechanical Floor scale with wheels

Platform (mm)	Capacity ( kg )	Division (g)	Overall dimensions LxPxH
800 x 750	150	50	750x1050x1760
800 x 750	200	50	750x1050x1760
800 x 750	300	100	750x1050x1760
800 x 750	400	100	750x1050x1760
800 x 750	500	500	750x1050x1760
800 x 750	600	200	750x1050x1760
800 x 750	800	200	750x1050x1760

## **Available options**

AISI304 stainless steel loading platform and tubular column protection Completely AISI304 stainless steel version

Two reading dials

**Zinc plated levers** 

Painted or stainless steel folding loading platform

Painted or stainless steel hanging rail with hook

Tare bar with one dial round capacity
