Marsden M-110: A multi-functional, easy to use column scale

The Marsden M-110 combines robust, high quality construction with easy to use features. Get **weight, height and BMI readings** easily via an **intuitive indicator, clear displays** and a range of optional extras.

One scale, multiple functions

The Marsden M-110 is a **Class III Approved** column scale with a **high capacity** and the ability to measure a patient's BMI.

A **range of height measures are available** - choose a manual height measure, digital height measure with a clear, digital height reading, and an **automatic height measure that sends the height data directly to the scale's indicator**.

With height inputted, the M-110 can calculate and **display a patient's BMI**. Plus, **Hold and Tare functions** ensure you get an accurate, reliable weight reading.

A sturdy scale - but it's portable too

The M-110 is built to the Marsden standard for **professional medical scales**. That means a sturdy design that will withstand years of constant use.

We've also made this column scale as portable as possible. **Wheels are fitted to the bottom of the column** so it can be easily moved from room to room, or ward to ward. A **rechargeable battery** means you don't need to position it near a plug socket.

Easy to use indicator

The indicator for these scales is **clear and easy to use**. Two LCD screens provide **weight** (upper screen) and **height/BMI** (lower screen) readings. Plus, a numeric keypad means entering height details is easy, when required.

Plus, if you've chosen the optional printer, you can print readings out directly from the indicator using the Print button.

Key features

- Class III Approved
- Tare/Hold/Zero
- BMI calculation
- Robust, durable construction
- Large, clear displays
- Fitted with wheels for portability
- Optional height measures, printers and Bluetooth

Choose from multiple optional extras

Want to print out height, weight and BMI data? The M-110 can be purchased with a printer. Height measures are available, too; the automatic height measure, which calculates the patient's height and sends it to the scale's display, makes BMI calculation a far quicker process.

Specification

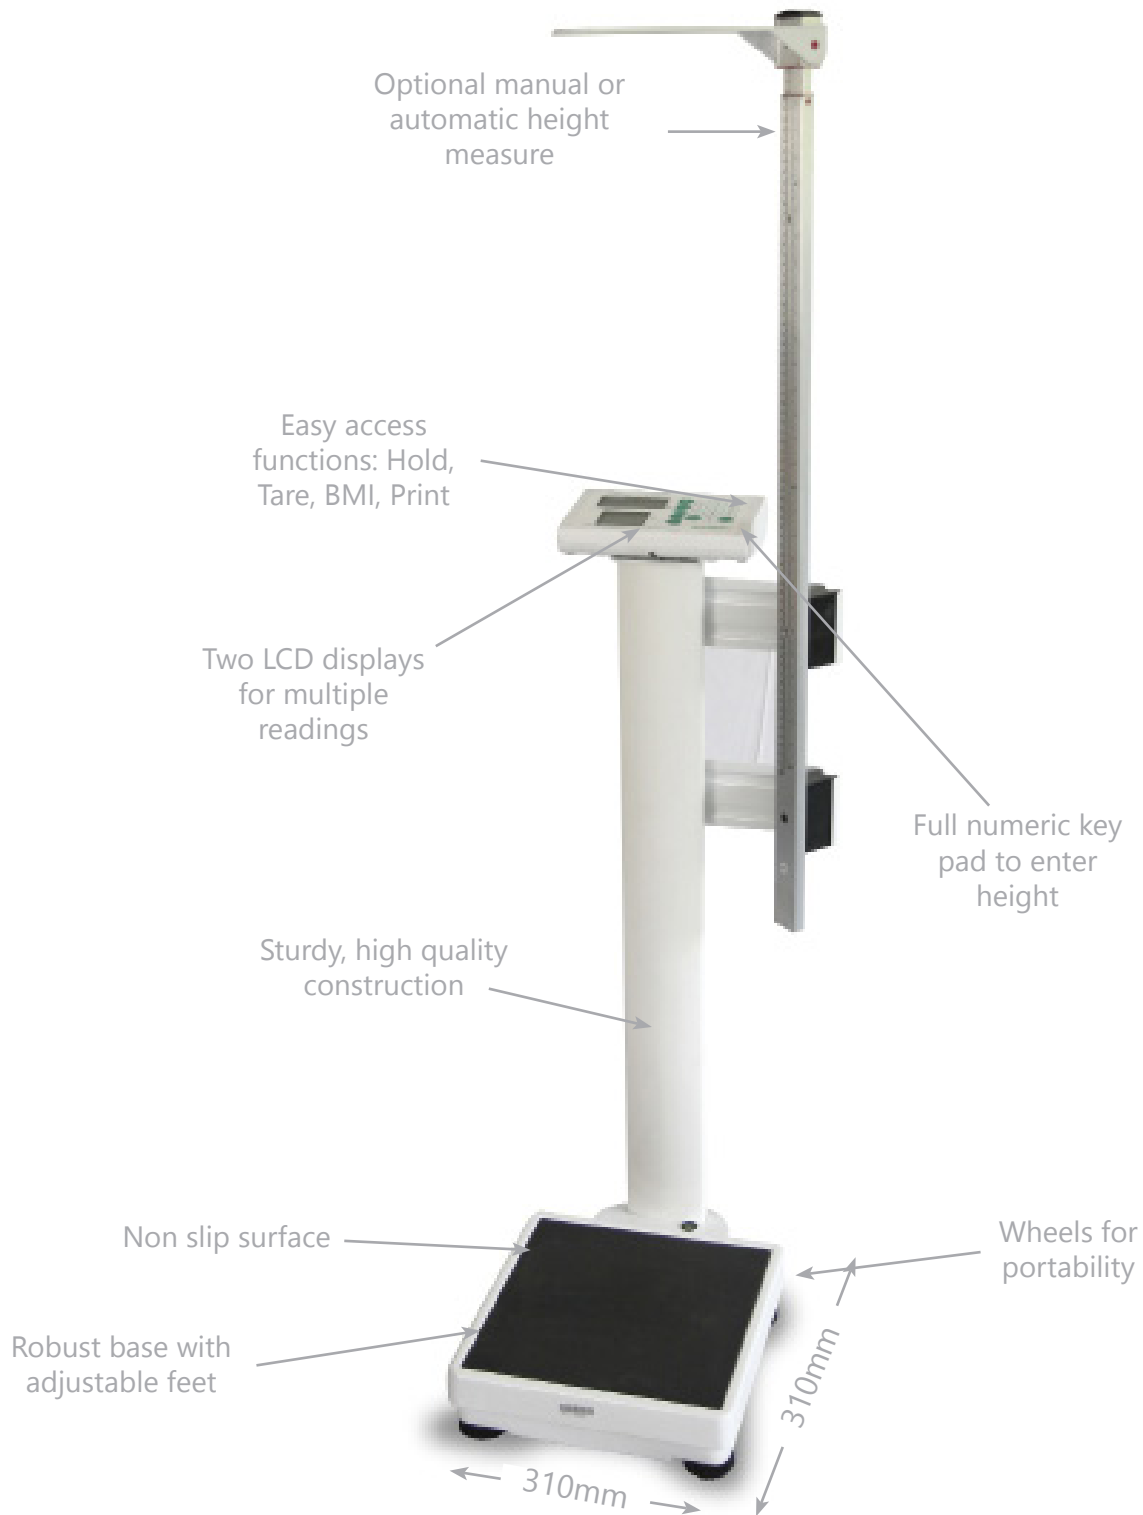

- Capacity: 250kg
- Graduations: 100g
- Weight of scale: 9kg
- Power Supply: Mains adaptor/rechargeable battery
- Dimensions (base): 310mm x 310mm x 90mm

Optional Extras

- Manual height measure (HM-201M)
- Digital height measure (HM-200D)
- Auto height measure (HM-201D)
- Printer (TP-2100)
- Bluetooth/USB connectivity
