Marsden M-225: Our entry level chair scale, upgraded

Marsden's M-220 low cost chair scale has changed.

Now available with our brand new I-300 indicator, the M-225 is still robust, reliable and long-lasting. But functions are easier to access, weight readings are clearer - and accuracy **has doubled to 100g**.

Class III accuracy for medical purposes

The M-220 was accurate to 200g. The M-225 is twice as accurate with 100g graduations, yet still retaining the **250kg capacity** needed to allow weighing of **almost any patient**.

100g accuracy makes the M-225 more than capable of **assisting in medical diagnosis**, as well as **measuring weight for critical treatment**, for example dialysis. A comfortable seat ensures stress-free weighing of patients that cannot stand.

Easy access features to save time

The indicator for the scale is a **brand new design**; the **display is larger** than previous models and features are **easily accessible**. Fewer buttons pressed means less time spent weighing.

A feature **unique to Marsden** is the **Body Surface Area (BSA) calculator** - meaning, along with the M-225's BMI function, you can get a true picture of a patient's body health.

BSA is most commonly used to calculate drug dosages, and we believe this is a **world first for a weighing scale**. Marsden scales with BSA calculation use the **Du Bois formula**.

Easier weighing of disabled patients

The M-220 was a **massive-seller** all around the world. So its replacement has a lot to live up to.

While we've replaced the indicator, we've kept the chair itself the same. It's still robust and easy to use - with a **comfortable seat, brakes on two castors** and **hinged armrests and footrests**.

Key features

- Class III Approved
- Mains operated or batteries
- Large, bright display
- Battery status indicator
- BMI/BSA calculation
- Hold/Tare
- Hinged armrests and footrests

9000 weigh-ins from one set of batteries

The M-225 can be powered from the mains, but for ultimate flexibility use 6x AA batteries. From full charge, these will last up to **180 hours** - that's around **9000 weigh-ins**.

Plus, get in touch if you want to keep your M-225 reliable and accurate for years by taking out a **Marsden service contract**.

Specification

- Capacity: 250kg
- Graduations: 100g
- Power: Mains adaptor or 6x AA batteries
- Seat dimensions: 400mm x 380mm
- Weight of Scale: 18kg
