Marsden M-545: Professional, high accuracy weighing for GPs and hospitals

If you need a **portable, high accuracy, built-to-last weighing scale** designed specifically for GPs, hospitals and care homes, choose the M-545.

With its 100g accuracy, the M-545 is suitable for **almost any user** - and its remote indicator makes it **ideal for weight sensitive environments**.

Class III accuracy for medical purposes

The Class III Approved M-545 replaces our hugely popular M-540. The main improvements over the M-540 are a **redesigned indicator, BSA calculation function and accuracy to 100g**.

With 100g graduations, the M-545 is twice as accurate as the M-540. It retains the **250kg capacity** needed to allow weighing of **almost any patient**.

100g accuracy makes the M-545 suitable for **assisting in medical diagnosis**, as well as **monitoring weight for critical treatment**.

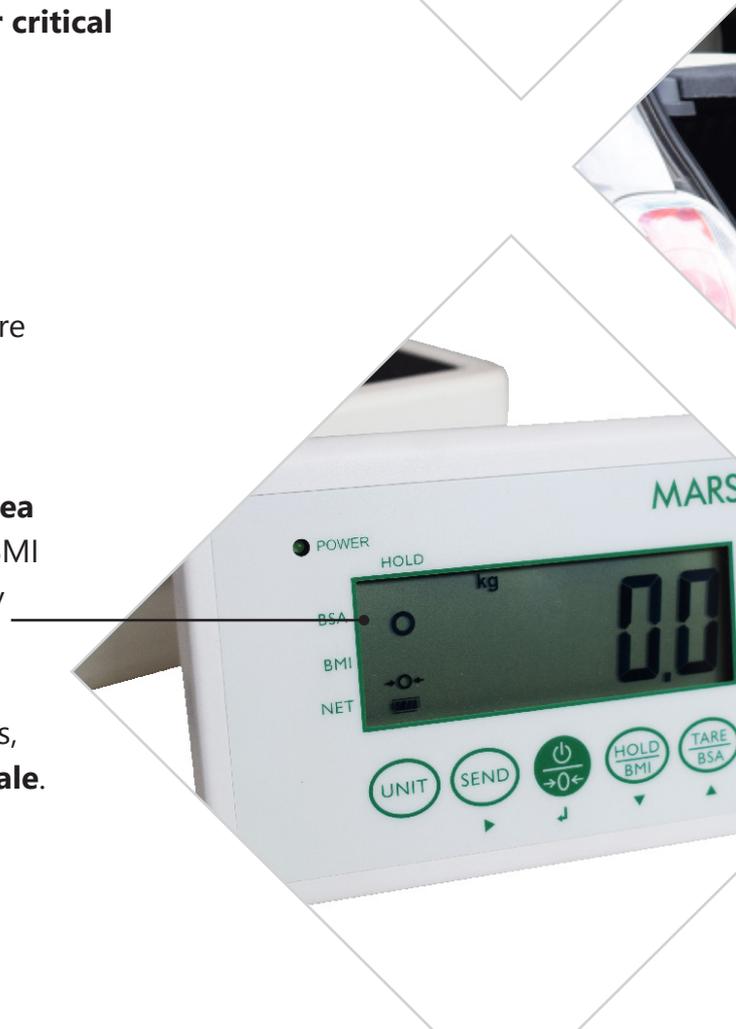

Easy access features to save time

The indicator for the scale is a **brand new design**; the **display is larger** than previous models and features are **easily accessible**. Fewer buttons pressed means less time spent weighing.

A feature **unique to Marsden** is the **Body Surface Area (BSA) calculator** - meaning, along with the M-545's BMI function, you can get a true picture of a patient's body health.

BSA is most commonly used to calculate drug dosages, and we believe this is a **world first for a weighing scale**. Marsden scales with BSA calculation use the **Du Bois formula**.

www.marsden-weighing.co.uk

Lightweight indicator, durable base

The indicator of the M-545 is **small and compact** - and the base of the scale has an **integrated carry handle**.

The base of the scale is a highly durable **reinforced aluminium unit** built for regular use. Plus, **6x AA batteries will last up to 180 hours before they need replacing** - that's around **9000 weigh-ins**.

Key features

- Class III Approved
- Mains operated or batteries
- Large, bright display
- Battery status indicator
- Separate indicator
- Integrated carry handle
- BMI/BSA calculation
- Hold/Tare

Accuracy assured, anywhere

The 100g accuracy of the M-545 means it's perfect for medical weighing in GP surgeries, hospitals and health centres.

Its portability, and optional carry case, make it a great solution for **personal trainers and slimming consultants** too.

Specification

- Capacity: 250kg
- Graduations: 100g
- Power: Mains adaptor or 6x AA batteries
- Base dimensions: 310mm x 310mm x 50mm
- Weight of Scale: 6kg
