Marsden P-NA-I-400: Industrial-sized weighing made simple

Thanks to a tough, **mild steel platform** and a big, bright, **easy to use** indicator, the **P-NA-I-400** makes weighing **heavy duty weighing** simple. This platform scale is designed for environments where lighting conditions are poor.

Reinforced platform for strength and durability

Marsden has been renowned for highly durable industrial weighing equipment for **90 years** - because of scales like the P-NA-I-400. Made from **reinforced** mild steel, it has **four 1000kg capacity** loadcells safely mounted within the structure of the platform, protecting them from damage when in use, or when the scale is being moved around your premises by forklift truck. **4m of loadcell cable** is included as standard.

Get a weight reading - in seconds

Thanks to the **ultra low-profile platform** (with a **5mm durbar** top plate), adding a load to the P-NA-I-400 is easy. Right up to three tonnes, the indicator will give you an accurate weight reading of your goods in **32mm high bright red digits**. In fact, the display is so clear you'll be able to see it in almost any environment. That's thanks to a **display resolution of 1/30,000**. Don't want the reading in **metric**? Just switch the display to **lb readings**. Weighing several pallets for one shipment? The P-NA-I-400 will automatically **add up the individual weights** when you select the **Accumulation function**.

A specification to suit your application

There's a P-NA-I-400 for everyone. Choose from a **range of graduations** - as accurate as 200g - and **capacities up to three tonnes**. Plus, there are **five size options**, from 750mm x 750mm to 1500mm x 1500mm.

Key features

- Mild steel construction
- 5mm durbar top plate
- Adjustable levelling feet
- Tare/Hold
- Accumulation
- Counting mode
- Unit switchable
- Four heavy duty load cells
- Large, 32mm high bright red LED display
- Programmable auto power-off/screensaver
- Mains powered or rechargeable battery
- Wall bracket for indicator

Easy access functions

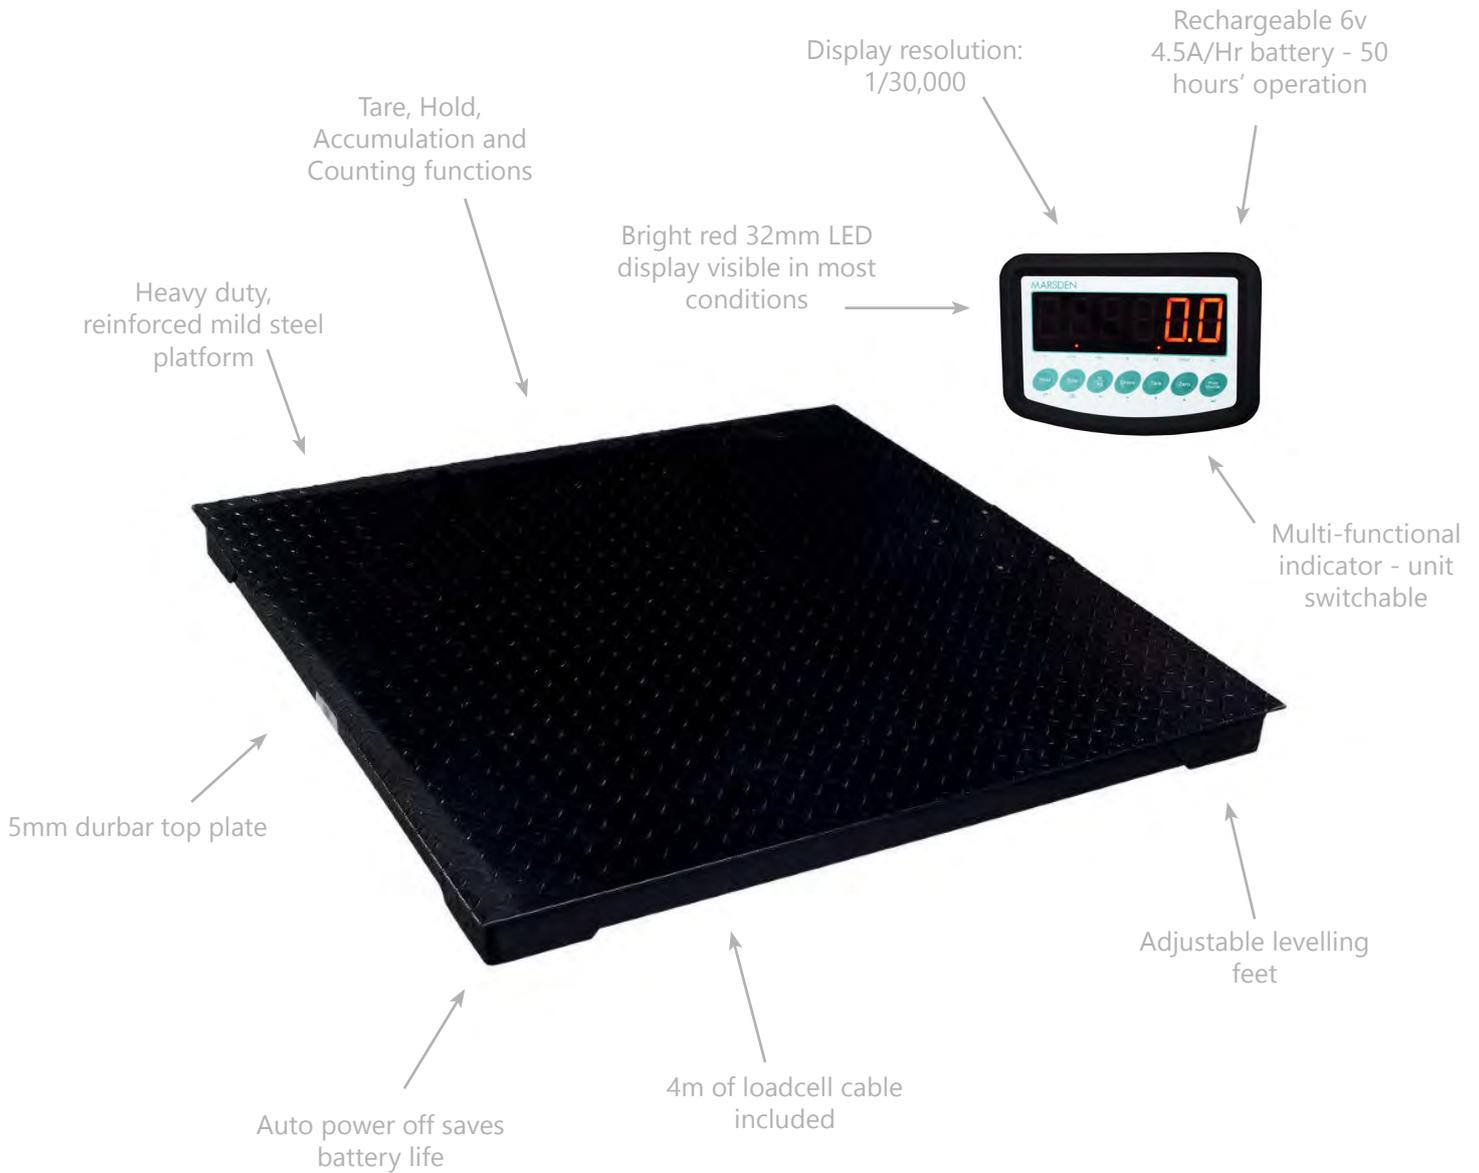

The P-NA-I-400's indicator is packed with easy to use features. **Tare** will allow you to remove the weight of a pallet or crate from the reading. **Hold** will stabilise the weight reading even if your load is moving around. The buttons are simply laid out, cleanly and clearly. Battery power lasts up to 50 hours.

Specification

- Capacities/graduations: 600kg x 0.2kg; 1500kg x 0.2kg; 1500kg x 05.kg; 3000kg x 0.5kg; 3000kg x 1kg
- Dimensions: 750mm x 750mm to 1500mm x 1500mm
- Display resolution: 1/30,000
- Platform height: 10cm
- Power: 6v 4.5A/Hr rechargeable battery
- Adaptor: 7v 1000ma mains adaptor
