

# Multi-purpose (MP) Load Bars

## Features and benefits:

- Versatile. Can be used with a temporary or permanent installation
- Compatible with any Tru-Test weigh scale
- Corrosion resistant zinc plated, gold passivated housing
- Rugged and durable load bars
- Reinforced cables to prevent damage
- Rubber feet provide extra grip and shock protection
- Fully water resistant.

## MP600

### Multi-purpose 600 mm load bars.

- 2,000 kg capacity
- Product code: 805122 (Standard).

## MP800

### Multi-purpose 800 mm load bars.

- 3,000 kg capacity
- Product code: 805123.

## MP1010

### Multi-purpose 1,010 mm load bars.

- 3,000 kg capacity
- Product code: 805124.

# Heavy Duty (HD) Load Bars

## Features and benefits:

- For permanent installation under a crush or crate where extra capacity and durability is required
- Compatible with any Tru-Test indicator
- Corrosion resistant galvanised housing
- Reinforced cables to prevent damage
- Fully water resistant.

## HD800

### Heavy duty 800 mm load bars.

- 3,000 kg capacity
- Product code: 805125 (with anchor bolts).

## HD1010

### Heavy duty 1,010 mm load bars.

- 3,000 kg capacity
- Product code: 708001 (with anchor bolts), 805126 (without anchor bolts).

# Load Cells

## XHD10000

### Extra heavy duty.

- 4,500 kg capacity
- For permanent installation in a high traffic crush or crate situation
- Compatible with any Tru-Test indicator
- Corrosion resistant plated and sealed load cell
- Product code: 808114 (4 x load cells with brackets), 805740 (4 x load cells).

## 250 kg Suspension Cell

### Versatile, rugged, ideal for mechanical scales conversions.

- 250 kg capacity
- 12 mm threaded mounting holes
- Product code: 818318.
